## Aquatooth Limited sample fee policy

2015-01-27 We are changing this, please bear with us!

This is the OLD sample fee policy:

Our policy is to charge a sample fee on all shipments below USD50,000

Once your orders have reached this then nil sample fees will be charged

Our sample fee varies between approximately 3% and 8%

With a minimum of USD75

In many cases despite the fact that we add a sample fee we will be supplying items at a loss due to fixed minimum export costs etc.

Also, tax is not levied on this fee when importing into most countries.

Some exceptions occur when samples are sent by airfreight as this is a simpler method and our costs are lowered, so we pass this on with lower minimum of USD50

We trust that you can accept our policy and invite your comment to help us improve.

Our NEW 'proposed' policy:

Still to be completed, however loosely NIL margin on all products, kinda cool eh?!

We add; 'Aquatooth QC service charge' Minimum USD 288 for all LCL shipments or 2.8% for all FCL.

Packing additional charges; only on LCL shipments, a Packing fee will be charged for whatever the amount is.

For the moment we are allowing USD 100 per small order and will pass on whatever the cost is to fully protect LCL shipments.
